About This Content

Night Environment completely revolutionizes night flying in the FSX: Steam Edition world. Using a series of databases, Night Environment adds brilliant, realistic lighting to your simulator. Hundreds of thousands of lights clearly show how highways connect to cities and how smaller roads meander through neighborhoods. Visual navigation at night becomes a real treat – it's even easier than flying VFR during daytime, as it often is in the real world.

The Night Environment database contains many more real-life roads than default FSX: Steam Edition, illuminating roads which are not visible during the daytime. All lights are visible for up to 60 miles, creating an authentic and dazzling flying experience featuring 3D effects.

Night Environment also comes with a configuration tool so you can adjust night lighting brightness, glow and color hues.

Features:

- Full coverage of Alps (including Austria, Switzerland and Lichtenstein)*
- All major roads and most smaller roads are illuminated
- Compatible with other scenery add-ons including Orbx FTX and most photo scenery
- Configurable for hardware performance

-
- Management tool (accessible via the Steam Tools menu) that allows you to adjust the output of all types of lights

*Please note that the German and Italian parts of the Alps are not included in this pack

Title: FSX Steam Edition: Night Environment: Alps Add-On

Genre: Simulation

Developer:

Chris Bell - Creative Design Studios

Publisher:

Dovetail Games - Flight

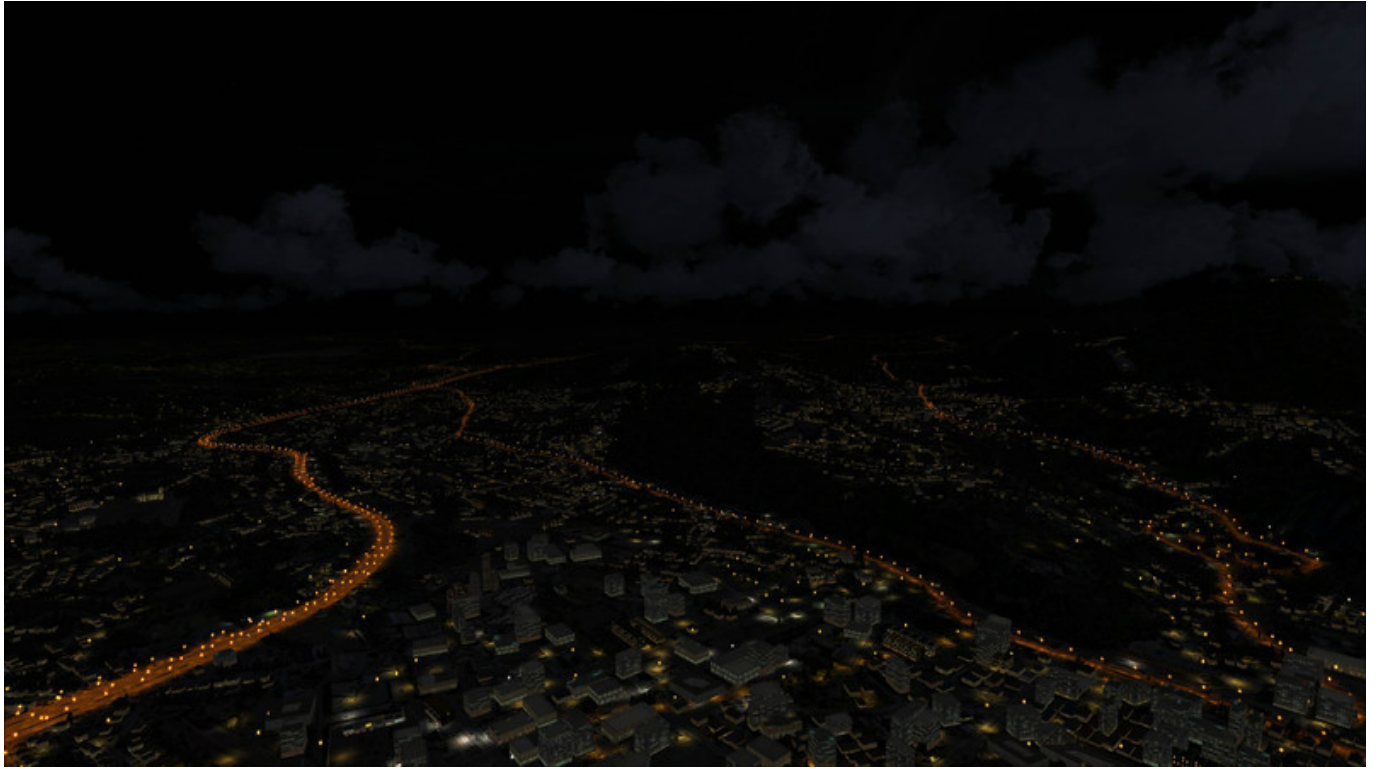

Release Date: 12 May, 2017

b4d347fde0
