This is a cool DLC. Had fun while going through it!

I will do some pros and cons for the DLC

PROS

- Missions which extend your playtime of the game for about an hour or two
- You can compete with your friends in those missions by achieving a better score than them
- You unlock some cool abilities like ripping people apart when consuming them or like the famous Mercer bullet-dive
- You get some cool weapons such as a Thermobaric Boomstick
- You get some great skins for Heller and you get skins for Mercer so you can play the whole game as him
- Some decent videos in which you can see the development of some models, sound testing, CGI recordings and some other stuff

CONS

- You don't get a lot of stuff for the price it is labeled as

I recommend this DLC. 7/10 would play as Mercer again!
