Any names posted here will be disregarded entirely.

As for news regarding development on the 4th game, things are not going too well. While I feel like it will be my most polished and possibly best game yet currently I am barely making anything off my games following the algorithm change on Steam a few months back. I am trying my absolute best to finish at least this 4th game but if that fails to turn a bare minimum I will have to cancel the series early and retire from making games.

????????????????????YeLuo?????????. UPDATE: Jumped the gun, back to the blocks!:

Ahah we did it, carefully planning and all, then we did set April the 16th as release date even while we deem september or october to be the most realistic time for the release of Empires.

So yeah, we went in home page as a game that did release, people did click on the game and still got a "Coming Soon" to welcome them on the page. Sorry for that guys, given that we often work around the clock on Empires, allow us a bit of brain burn once and then!

To make it clear, for us quality comes first. Too many stories of too many games rushed and released before it was time. Call us paranoid, call us nitpicky, call us how you like, but that's our approach. Better delayed than crappy.

What we are working on right now:

- Reworking the enemy units animations and memory management system, we save your RAM for darker days ahead
- Finishing and prepping the intro and outro cutscene including the voice acting (you're gonna get wet when we reveal you the name of our voice actor for the Sarge)
- Finishing map props (map bridges, mines and the snowy missing 5 maps)

What can you do now?

Follow us, follow us everywhere and chip in with your ideas, feedback, love or insults.

That said, I am back to coding, cause we ain't fancy fellas with a PR office :D

Can I also leave you a couple of tasty preview pics from the intro here?

Cheers,

Emiliano, [@DokHgn](#). **Age of Wonders V1.6 launches, includes new Tutorial:**

Today we unleash Age of Wonders v1.6! This free update includes an overhaul to Random Maps, which now features greatly enhanced Underground experience. Other improvements include balance and interface fixes, enhanced AI, loading screen tips and a Tutorial for beginning players. V1.6 is available now on Steam and GoG!

Hey everyone!

We are getting ready to push a new patch tomorrow. The most important issues this patch should fix are the ones with getting stuck in conversation.

We could really use some help testing this patch, to make sure everything is indeed fixed. If you have a little time at hand and want to help, please comment here, or on our discord (<https://discord.gg/jgFu7mc>) or twitter (@Valiant_GS) or mail (hello [at] valiant.se).

Thank you so very much!

Laura
